We realize that you may feel that more than one statement may relate to you, but ***PLEASE JUST CIRCLE THE ONE CHOICE WHICH MOST CLOSELY DESCRIBES YOUR PROBLEM RIGHT NOW.***

SCORING TECHNIQUE FOR NECK DISABILITY INDEX

1. Each of the 10 sections is scored separately (0 to 5 points each) and then added up (max. total = 50).

EXAMPLE:

Section 1. Pain Intensity Point Value

- A. _____ I have no pain at the moment 0
- B. _____ The pain is very mild at the moment 1
- C. _____ The pain is moderate at the moment 2
- D. _____ The pain is fairly severe at the moment 3
- E. _____ The pain is very severe at the moment 4
- F. _____ The pain is the worst imaginable 5

2. If all 10 sections are completed, simply double the patients score.

3. If a section is omitted, divide the patient's total score by the number of sections completed times 5.

FORMULA: PATIENT'S SCORE X 100 = _____ % DISABILITY
OF SECTIONS COMPLETED X 5

EXAMPLE:

If 9 of 10 sections are completed, divide the patient's score by 9 X 5 = 45; if.....

Patient's Score: 22

Number of sections completed: 9 (9 X 5 = 45)

$22/45 \times 100 = 48\%$ disability
